

MAYANK TRIVEDI

Chitrakoot, Uttar Pradesh

+91-8318512734 — trivedim115@gmail.com — LinkedIn: Mayank Trivedi — GitHub: Mayank05

EDUCATION

Bundelkhand Institute of Engineering & Technology

B.Tech in Computer Science and Engineering – **CGPA: 8.83**

2023 – 2027

Jhansi, India

TECHNICAL SKILLS

Languages: Python, Golang, C, C++, JavaScript, TypeScript, SQL, NoSQL

Backend & Cloud: Node.js, Express.js, Microservices, Redis, MongoDB, MySQL, PostgreSQL, Docker, AWS S3

Frontend: React.js, Redux Toolkit, Tailwind CSS, Recharts, HTML5/CSS3

Gen AI & Tools: LLMs, RAG, LangChain, LangGraph, Qdrant Vector DB, OpenAI API, Gemini API, Git, Postman, Firebase

EXPERIENCE

Freelance Software Development

Jul 2025 – Sep 2025

Full Stack & Systems Developer

Remote, India

- Architected and deployed custom web applications for clients, integrating **Node.js**, **React.js**, and **PostgreSQL** to deliver dynamic user dashboards and secure API gateways.
- Engineered distributed caching with **Redis** and database indexing, improving API response times by **30%** across high-traffic data workflows.

PROJECTS

Multi-Agent.AI [Live Demo] [GitHub] | Node.js, React, Docker, Redis, Qdrant, LangGraph, LangChain, Groq

- Engineered an event-driven microservices backend (API Gateway, Auth, Chat, AI Agent, Billing) using Node.js, Express, and Redis Pub/Sub for low-latency inter-service communication.
- Built an autonomous multi-agent AI pipeline (Vision, PDF RAG, Web Search, PPT Generation) utilizing Qdrant Vector DB, LangChain, and Groq/Gemini LLMs for real-time multimodal processing.
- Implemented Redis caching, MongoDB Atlas persistence, and AWS S3 object storage; containerized 5 microservices with Docker Compose and Nginx reverse proxy for production deployment.

InterViewIQ.AI [Live Demo] [GitHub] | React 19, Node.js, Express.js, MongoDB, GPT-4o-mini, JWT, Razorpay

- Built a full-stack AI-powered Mock Interview Platform with instant evaluation using OpenAI GPT-4o-mini via OpenRouter API for role-specific, adaptive-difficulty questions.
- Developed a secure resume parsing pipeline using Multer and PDF.js, converting uploaded PDF resumes into structured JSON payloads for AI processing.
- Integrated JWT authentication and Razorpay Payment Gateway for a credit-based subscription model, featuring a analytics dashboard built with Redux Toolkit and Recharts.

Hotel Booking [GitHub] | Golang, Node.js, Express.js, TypeScript, Redis, MySQL, JWT, REST APIs

- Architected a microservices-driven hotel booking platform with Golang and Node.js, enabling scalable, fault-tolerant, and independently deployable services.
- Implemented distributed locking using **Redis Redlock** and idempotency mechanisms, effectively eliminating race conditions and preventing duplicate bookings under high concurrency.
- Developed a JWT authentication service and reverse proxy gateway with asynchronous background tasks via Redis queues for notification dispatches.

CERTIFICATIONS

- Introduction to Generative AI** – Google Cloud
- AWS Services Fundamentals** – Simplilearn
- Full Stack Developer Certification** – Simplilearn

ACHIEVEMENTS

- Solved **350+** Data Structures & Algorithms problems across LeetCode Profiles: **Profile 1 (mayank83)** — **CP Profile (mayank9794)**.
- Achieved a Global Rank of **1098** in LeetCode Weekly Contest 427.
- Qualified **GATE** (Computer Science) Examination with a score of **450**.
