SUMMARY

Agentic AI & Generative AI Engineer and 3rd-year B.Tech CSE student (CGPA: 8.83) specializing in multi-agent orchestration (LangGraph, CrewAI), RAG pipelines, LLM tool calling, vector databases (Qdrant), and automated workflow pipelines. Experienced in building autonomous AI agents, API integrations, and Python backends. Seeking an Agentic AI Engineer Intern role.

EDUCATION

Bundelkhand Institute of Engineering & Technology
B.Tech in Computer Science and Engineering – CGPA: 8.83

2023 – 2027
Jhansi, UP, India

TECHNICAL SKILLS

Agentic AI & Frameworks: Agentic AI Systems, LangGraph, LangChain, CrewAI, Model Context Protocol (MCP), Multi-Agent Orchestration, Tool Calling, Function Calling
Gen AI, LLMs & RAG: RAG Pipelines, Vector DBs (Qdrant), Prompt Engineering, OpenAI API (GPT-4o), Claude API, Gemini API, Groq, Pydantic
Workflow Automation & APIs: n8n, Make, REST API Integration, Automated ETL Pipelines, API Debugging, Middleware
Languages & AI Backend: Python, TypeScript, JavaScript, C++, SQL, Node.js, Express.js
Cloud & Developer Tools: Redis, Docker, Docker Compose, AWS S3, Nginx, Git, GitHub, Postman, Vercel

EXPERIENCE

NextMAS Innovations (OPC) Private Limited
Software Development Intern

Aug 2026 – Present
Remote, India

- Engineered modular backend API services and automated workflows for an enterprise web platform using **PHP, Laravel**, and **MySQL**.
- Integrated **LLM-powered** workflows and optimized RESTful APIs with **Redis caching**, improving response latency for real-time context retrieval.
- Implemented multi-guard authentication, role-based access control (RBAC), and reusable secure data processing traits.

VELOOP REWARDS

July 2026 – Aug 2026
Remote, India

- Engineered a responsive **Gamified Dashboard** and interactive state-driven UI in **React.js, Vite**, and **CSS Modules**.
- Integrated stateful user interaction workflows with real-time score tracking, dynamic reward triggers, and automated notification states.

PROJECTS

Multi-Agent AI Platform [[GitHub](#)] | *Python, LangGraph, LangChain, Qdrant Vector DB, Redis, Docker, Groq*

- Architected a multi-agent platform orchestrating **5 microservices** with **LangGraph** for autonomous task routing, memory persistence, and tool execution.
- Engineered multimodal agent workflows (**Vision, PDF RAG, Web Search, PPT Generation**) using **Qdrant Vector DB** and Redis Pub/Sub for real-time response streaming to the React UI.
- Built containerized deployments using **Docker Compose** and **Nginx** reverse proxy for scalable microservice communication.

NexusData – Agentic SQL & ETL Data Agent [[GitHub](#)] | *Python, LangGraph, PostgreSQL, Pandas, Pydantic, Claude*

- Engineered a hierarchical agentic data system with **LangGraph** router nodes delegating queries to specialized **SQL Analyst** and **ETL Analyst** sub-agents.
- Implemented **SQL Safety Validation** (AST checks) to prevent destructive queries (**DROP, DELETE**) and dynamic LLM model selection for cost optimization.
- Built automated Python/Pandas data transformation pipelines for extracting API JSON data and structuring exports into CSV/Parquet formats.

ACHIEVEMENTS

- Solved **350+** Data Structures & Algorithms problems — **LeetCode (mayank83)**.
- Achieved a Global Rank of **1098** in LeetCode Weekly Contest 427.
- Qualified **GATE CS 2026** (Computer Science) Examination with a score of **420**.
