Chitrakoot, Uttar Pradesh

+91-8318512734 — trivedim115@gmail.com — Portfolio — LinkedIn: Mayank Trivedi — GitHub: Mayank05

SUMMARY

Full Stack Developer (MERN/Node.js) with hands-on experience building production-grade Generative AI systems — multi-agent pipelines, LLM orchestration, RAG (Retrieval-Augmented Generation), and REST API integrations. Proficient in Python, JavaScript/TypeScript, React.js, Node.js, and cloud deployment (AWS, Docker). Seeking a Full Stack , AI/ML Intern or Software Development Intern (SDE Intern) role to ship end-to-end AI-powered features from backend architecture to UI.

EDUCATION

Bundelkhand Institute of Engineering & Technology
B.Tech in Computer Science and Engineering – CGPA: 8.83

2023 – 2027
Jhansi, India

TECHNICAL SKILLS

Gen AI & Tools: LLMs, RAG, LangChain, LangGraph, Agentic AI, Qdrant Vector DB, OpenAI API, Gemini API

Languages: Python, JavaScript, TypeScript, Golang, C, C++, SQL, NoSQL

Backend & Cloud: Node.js, Express.js, Microservices, Redis, MongoDB, MySQL, PostgreSQL, Docker, AWS S3, Firebase

Frontend: React.js, Redux Toolkit, Tailwind CSS, Recharts, HTML5/CSS3

Tools: Git, Postman

EXPERIENCE

NextMAS Innovations (OPC) Private Limited

Aug 2026 – Present

Software Development Intern

Remote, India

- Engineered full-stack features using **React.js**, **Node.js**, and **Laravel**, building dynamic UI components and backend RESTful APIs for commercial client applications.
- Integrated **LLM**-powered Generative AI pipelines and automated workflows to enhance application performance, smart context retrieval, and user engagement.

PROJECTS

Multi-Agent.AI [[GitHub](#)] | *Node.js, React, Docker, Redis, Qdrant, LangGraph, LangChain, Groq*

- Built a full-stack, autonomous multi-agent AI platform end-to-end — React UI, event-driven Node.js/Express microservices (API Gateway, Auth, Chat, AI Agent, Billing), and a LangChain/LangGraph agent orchestration layer.
- Designed a multimodal agent pipeline (Vision, PDF RAG, Web Search, PPT Generation) powered by Qdrant Vector DB and Groq/Gemini LLMs, exposed to users as real-time chat responses in the React frontend.
- Used Redis Pub/Sub for low-latency inter-service communication and caching, MongoDB Atlas for persistence, and AWS S3 for object storage; containerized 5 microservices with Docker Compose and Nginx for production deployment.

InterViewIQ.Ai [[Live Demo](#)] [[GitHub](#)] | *React 19, Node.js, Express.js, MongoDB, GPT-4o-mini, JWT, Razorpay*

- Built a full-stack AI-powered Mock Interview Platform, wiring a React 19 UI to OpenAI GPT-4o-mini (via OpenRouter) on the backend for instant, role-specific, adaptive-difficulty question generation and evaluation.
- Built a resume-to-AI-context pipeline: secure PDF parsing with Multer and PDF.js converts uploaded resumes into structured JSON that drives the LLM's personalized interview questions.
- Shipped a credit-based subscription model with JWT auth and Razorpay payments, plus a Redux Toolkit/Recharts analytics dashboard for tracking user interview performance.

Hotel Booking Platform [[GitHub](#)] | *Golang, Node.js, Express.js, TypeScript, Redis, MySQL, JWT*

- Architected a microservices-driven booking platform (Golang + Node.js) with a JWT auth service and reverse proxy gateway for scalable, independently deployable services.
- Implemented distributed locking with **Redis Redlock** and idempotency checks to eliminate race conditions and duplicate bookings under high concurrency.

CERTIFICATIONS

- **Getting Started with Generative AI** – IBM SkillsBuild
- **AWS Services Fundamentals** – Simplilearn
- **Full Stack Developer Certification** – Simplilearn

ACHIEVEMENTS

- Solved **350+** Data Structures & Algorithms problems — **LeetCode (mayank83)**
— **Contest Profile (mayank9794)**.
- Achieved a Global Rank of **1098** in LeetCode Weekly Contest 427.
- Qualified **GATE** (Computer Science) Examination with a score of **420**.
