SUMMARY

Full Stack Developer (MERN/Laravel) with hands-on experience building production-grade Generative AI systems — multi-agent pipelines, LLM orchestration, RAG, and REST API integrations. Proficient in Python, JavaScript/TypeScript, React.js, Node.js, PHP/Laravel, Redis, and Docker. Seeking a Full Stack, AI/ML Intern, or Software Development Intern (SDE Intern) role to ship end-to-end scalable features from backend architecture to UI.

EDUCATION

Bundelkhand Institute of Engineering & Technology
B.Tech in Computer Science and Engineering – CGPA: 8.83

2023 – 2027
Jhansi, India

TECHNICAL SKILLS

Gen AI & Tools: LLMs, RAG, LangChain, LangGraph, Agentic AI, Qdrant Vector DB, OpenAI API, Gemini API
Languages: Python, PHP, JavaScript, TypeScript, Golang, C, C++, SQL, NoSQL
Backend & Cloud: Laravel, Node.js, Express.js, Microservices, Redis, MongoDB, MySQL, PostgreSQL, Docker, AWS S3
Frontend: React.js, Redux Toolkit, Tailwind CSS, Recharts, HTML5/CSS3
Tools: Git, Postman

EXPERIENCE

NextMAS Innovations (OPC) Private Limited

Aug 2026 – Present

Software Development Intern

Remote, India

- Engineered an enterprise **Community Discussion Forum Platform** using **Laravel, PHP, MySQL**, and **Tailwind CSS**, implementing multi-guard authentication, role-based access control (Admin/User), and user dashboards.
- Developed modular backend services including reusable **FileUpload Traits** for secure media processing, password encryption pipelines, and flash notification middleware.
- Integrated **LLM-powered** workflows and optimized RESTful APIs with Redis caching, boosting response speed by **35%** and streamlining client context retrieval.
- Implemented **Razorpay** payment gateway integration for secure transaction processing within the platform.

PROJECTS

Multi-Agent.AI [[GitHub](#)] | *Node.js, React, Docker, Redis, Qdrant, LangGraph, LangChain, Groq*

- Architected an autonomous multi-agent platform orchestrating **5 containerized microservices** (Gateway, Auth, Chat, AI Agent, Billing) using **Docker Compose** and **Nginx**, with **MongoDB Atlas** for persistence and **AWS S3** for object storage.
- Engineered multimodal agent workflows (Vision, PDF RAG, Web Search, PPT Generation) with **LangGraph**, **Qdrant Vector DB**, and Redis Pub/Sub, cutting agent response latency to sub-second for real-time streaming to the React UI.

InterviewIQ.AI [[Live Demo](#)] [[GitHub](#)] | *React 19, Node.js, Express.js, MongoDB, GPT-4o-mini, JWT, Razorpay*

- Built an AI mock interview platform utilizing **GPT-4o-mini** to generate real-time, role-specific adaptive questions from parsed candidate resumes, converting raw PDFs into structured JSON context via Multer/PDF.js.
- Shipped credit-based billing with **Razorpay** and JWT auth, plus an interactive performance analytics dashboard using **Redux Toolkit** and **Recharts** to track user interview scores over time.

Hotel Booking Platform [[GitHub](#)] | *Golang, Node.js, Express.js, TypeScript, Redis, MySQL, JWT*

- Designed a high-concurrency microservices booking engine (Golang + Node.js) with a reverse-proxy gateway and JWT auth service for isolated, independently scalable services.
- Implemented distributed locking with **Redis Redlock** and idempotency checks to eliminate race conditions and double-booking under peak concurrent traffic.

CERTIFICATIONS

- Getting Started with Generative AI** – IBM SkillsBuild
- AWS Services Fundamentals** – Simplilearn
- Full Stack Developer Certification** – Simplilearn

ACHIEVEMENTS

- Solved **350+** Data Structures & Algorithms problems — [LeetCode \(mayank83\)](#) — [Contest Profile \(mayank9794\)](#).
- Achieved a Global Rank of **1098** in LeetCode Weekly Contest 427.
- Qualified **GATE** (Computer Science) Examination with a score of **420**.
